## **Bulletin 1127 - 03/17 – ECDIS Performance Check**

**The International Hydrographic Organization has issued a bulletin on ECDIS Performance Checks**

The checks are designed to make mariners aware of any deficiencies with their system. Through feedback to the IHO it is also intended to build up a database of how different types of ECDIS display and handle data; this will in turn be passed to national hydrographic offices and the IMO.

Further information can be found in the attached PDFs.
